TE000008

S/T interface for ISDN basic access

Scope:

Specify characteristics of interfaces

Applicability:

Document for CETIN, property only.

Process:

Technologie hlasových a mob.sítí a služeb, CETIN

1 Initial provisions

1.1 Scope

The purpose of this document is to specify characteristics of interfaces to be used between AN and TEs on one side and between AN and SNs (LE, LL, DN, ...) on the other side, in the access network of the company Česká telekomunikační infrastruktura a.s.

1.2 Validity and obligation

The document is according to the Directive SM000786 a valid recommendation of the company Česká telekomunikační infrastruktura a.s. If needed, the validity and obligation for external subjects is to be set by an appropriate clause of the contract. The document is valid from the date of approval (see the first page).

1.3 Document history

Example:

Ver.	Date	Title	Note
1	03/2016	S-T Interface for ISDN Basic Access	New document
2			
2			

1.4 Definitions

-not used-

1.5 Abbreviations

ANE	Access Network Element
APS	Auxiliary Power Supply
DDI	Direct dialling in
DLL	Digital Local Line
DN	Data Network
DTS	Digital Transmission System
EOC	Embedded Operations Channel
IPS	Internal Power Supply
ITS 2M	Integral Transmission System with 2084 kbit/s bit rate
LE	Local Exchange
LL	Leased Line
LT	Line Termination
LTU	Line Termination Unit
PABX	Private Automatic Branch Exchange
PSTN	Public Switching Telephone Network
R	Resistance
SN	Service Node
SNI	Service Node interface
TS	64 kbps Time Slot
UOA	DLL-Only-Activation
UNI	User Network Interface

1.6 Records

This document does not require records in the sense of the Directive SM000796, it has the nature of a recommendation and/or technical information.

1.7 Reference

1.7.1 Replaced and withdrawn documents (if any)

1.7.2 Related internal documents (if any)

2 Access Network Interfaces

The following Figure 1 describes the generic structure of an ANE.

Figure 1: Generic structure of ANE

3 S/T interface for ISDN Basic Access

3.1 General requirement

NT1 parameters shall comply with ETS 300 012 with the following specified Options.

3.2 ETS 300 012, clause 7.1.4.4.2

TE connection surge capability

3.2.1 The maximum number of terminals to be fed from Power Source 1 (normal mode) is 4 of 1 W each.

3.2.2 The NT1 shall provide at least 4.4 W (4 W multiplied by 1.1 bus-wiring minimum loading factor).

3.3 ETS 300012, clause 7.3.1

Power available for an APS
Not applicable.

3.4 ETS 300 012, clause 7.4

Additional requirements for NT1 restricted mode source for compatibility with an APS
Not applicable (see 3.2.3 above).

3.5 ETS 300 012, clause A.4.5

NT and TE associated wiring
The terminating resistors of 100 Ω at the NT1 side shall be connected internally to the NT1. It shall be possible to switch on or off the terminating resistor connection (user accessible parts).

3.6 ETS 300 012, clause A.6.2.4.1

Activating/deactivating NTs
The value of timer T2 is in range 25 ms to 100 ms.

3.7 ETS 300 012, clause A.8.6.2

The NT1 complies with all possible wiring configurations, except the NT1 STAR configuration acc. to figure A-4/I.430. Selection of the applicable wiring configurations takes place by means of miniswitches.

3.8 ETS 300 012, clause A.8.6.3

NT1 receiver input delay characteristics
The NT1 accommodates round trip delays for all possible wiring configurations, except the NT1 STAR configuration acc. to figure A-4/I.430.
The delay is dependent on the selected wiring configuration.

3.9 ETS 300 012, clause A.9.1.

Reference configuration
NOTE 4: The provision of Power Source 2 is not required.
NOTE 5: The remote powering of the NT1 from a TE via the interface (power sink 3) shall not be possible.
NOTE 6: Not applicable.

3.10 ETS 300 012, clause A.9.1.2

Provision of Power Sources and sinks.

3.10.1 The capability of the provision of Power Source 1 normal , shall be possible by means of an Internal Power Supply (IPS as an integral part of the NT1).

3.10.2 The provision of Power Source 2: is not required

3.10.3 Power Sinks 1 and 2: Not applicable.

3.11 ETS 300 012, clause A.9.2.1

Power Source 1 normal and restricted power conditions

Power Source 1 shall provide both normal and restricted power conditions.

3.12 ETS 300 012, clause A.9.2.3

Minimum voltage of Power Source 2

Not applicable.

3.13 ETS 300 012, clause A.9.3.2

Power Source 2 - optional third pair

Not applicable.

4 Conclusive statements
